*Founded 1928
Candelaria, Quezon*

GENERAL RESEARCH ETHICS CHECKLIST

This checklist is to ensure that the research conducted by bonafide academicians of the Tayabas Western Academy is carried out according to the guiding principles outlined in the Ethical Principles of Research and the Student Handbook. Statements pertinent to ethical issues in research should be addressed below. The checklist will help the researcher/s and advisers/readers/evaluators determine whether procedures should be undertaken during the semester of the research to maintain ethical standards. The researchers ensure guidance and responsible conduct of study in any field.

GENERAL INFORMATION:

Name of Researcher/s :

PF V. TARUZA

KHIAN MIKE JAY M. CASTILLO

JANINA C. PADERGAO

HARICH F, BAHYO

AIMEE T. MARASIGAN

ERHONE KIEL DE TORRES

Strand : ☐ ABM ☐ STEM ☐ GA ☐ HUMSS ☒ ICT ☐ HE

Term / AY enrolled :

AY 2025-2026

Note: This checklist must be completed AFTER the School's Ethical Committee has been approved and BEFORE data gathering.

QUESTIONS	YES	NO
1. Does your research involve human participants (this includes new data gathered or using pre-existing data)? If your answer is yes, <i>Please specify if the kind of research you will be conducting falls under any of the following Human Participants sub-categories:</i>		
<i>I.A. Will you be conducting Research in an existing business, company, or school?</i>		
<i>If YES, the following should be attached to the checklist or</i>		

<i>appendices: a copy of the informed consent form to be used in the study; A copy of the instrument/tool that will be administered to the participants; If applicable, a copy of the letter seeking permission to collect data from participants who are under the supervision of an agency, institution, department, or office; if applicable, a copy of the parental consent form for participants below 18 years old.</i>		
<i>1.B. Does your research involve online communities (this includes searching data from social media platforms, online forums and blogs)?</i> <i>If your answer is YES, indicate all the URLs in the Bibliography as Online references in APA format.</i>		
<i>1.C. Does your research involve human participants who are situated in a community and may necessitate permission to acquire access to them?</i> <i>If your answer is YES, include in the methodology section of your research proposal how you will be obtaining free consent from the community members (written informed consent, verbal informed consent, plain language statements, and translated consent forms) Attach a proposed community research agreement form for approval by the community. The agreement form should contain the responsibilities of community partners and researchers in the project, and an agreement on follow-up report and/or ownership and publication of findings. The signatories of this agreement are the researcher(s) and community designated representative(s).</i>		
2. Will your research make use of documents which are not in the public domain and, thus, require permission for use from the custodian of such documents? <i>If YES, please provide certification that permission from the custodian of the data was sought and granted.</i>		
3. Will your research make use of secondary data (e.g., surveys, inventories, plans, official documents, etc.) from an institution, organization, or agency, which are not in the public domain and, thus, require permission for use from the custodian of such documents? <i>If YES, please provide certification that permission to use the data was sought from the institution, organization, or agency and approval was granted.</i>		
4. Does your research involve animals (non-human subjects)? <i>If your answer is YES, please describe why the animal involvement is needed and how it will be done; identify the substance/drug/extract if any and what the expected outcomes/effects of the drug will be on the organism/animal?; likewise, attach an argument that outlines how the condition of the animal is of vital importance to the outcome of the study.</i>		

QUESTIONS	YES	NO
5. Does your research involve microorganisms that are infectious, disease causing or harmful to health? <i>If your answer is YES, enlist the classification of infectious agent(s); provide a brief description of the data collection procedure to be undertaken and attach the description of the procedure for the disposal and where these used items will be disposed.</i>		
6. Does your research involve laboratory works/toxic/chemicals/substances/materials? <i>If your answer is YES, provide a consent to the laboratory maintenance; a brief description of chemicals to be used and the data collection procedure to be undertaken; provide information on the first-aid measures, accidental release measures, appropriate personal protective equipment and necessary precautions to ensure safety and proper handling of chemicals.</i>		

Research with Ethical Issues to address:

If you have a YES answer to any of the above categories, you will be required to produce and complete for that particular category. A *YES* answer does not mean the disapproval of your research proposal. By providing you with a more detailed checklist, it is ensured that the ethical concerns are identified so these can be addressed in adherence to the research ethic

Declaration of Conflict of Interest

- ☐ I do NOT have a conflict of interest in any form (personal, financial, proprietary, or professional) with the sponsor/grant-giving organization, the study, the co-investigators/personnel, or the site.
- ☐ I do have a conflict of interest, specifically:

☐ I have a personal/family or professional interest in the results of the study (family members who are co-proponents or personnel in the study, membership in relevant professional associations/organizations). Please describe the personal/family or professional interest:

- ☐ I have significant financial interest vested in this proposal
Please describe financial interest:

Note: Researchers are requested to provide a copy of their Curriculum Vitae, or any document that provides information on the researchers' history of activities or experience (including past research, presentations, other project involvements, volunteer work, etc.).

.....

DECLARATION

I certify that I understood the Responsible Conduct of Research and will abide by the ethical principles in this document. I will submit a final report of the proposed study to the Research Adviser and/or committee concerns. I will not commence with data collection until I receive an ethics review approval from the Research Ethics Review Committee.

PF V. TARUZA

Name and Signature of Researcher or Representative

_____ Date

I confirm that the student(s) is/are capable of undertaking this research in a safe and ethical manner.

VICENTE F. PORTO

Adviser's Name and Signature

_____ Date

Research Ethics Checklist

The purpose of this checklist is to ensure that the research conducted by the bonafide academicians of the Tayabas Western Academy is carried out according to the guiding principles outlined in the Ethical Principles of Research and the Student Handbook. The statements below address ethical issues that should be considered when conducting research. This checklist will help the researcher/s, advisers, readers, and evaluators determine whether the appropriate procedures are being followed during the research process to maintain ethical standards.

Minimizing the risk of harm:

- ☐ *The research design minimizes the potential for harm to the participants.*
- ☐ *Informed consent forms have been obtained from all participants.*
- ☐ *The participant's privacy and confidentiality have been protected.*

Obtaining informed consent:

- ☐ Participants have been fully informed about the purpose and procedures of the research.
- ☐ Participants have been advised of their right to withdraw from the study at any time.
- ☐ Participants have given their voluntary and informed consent to participate in the study.

Protecting anonymity and confidentiality:

- ☐ Personal identifiers have been removed from the data collected.
- ☐ Measures have been taken to ensure that participants' identities cannot be linked to their responses.
- ☐ The data collected will be stored securely and confidentially.

Avoiding deceptive practices:

- ☐ Participants have not been misled about the nature of the research or the methods used to collect data.
- ☐ The research design does not include deceptive practices that may harm participants.

Providing the respondents and informants' right to withdraw:

- ☐ Participants have been advised of their right to withdraw from the study at any time.
- ☐ Participants' decision to withdraw will not result in any adverse consequences for them.

By reviewing and checking each item on this research ethics checklist, the researcher/s, advisers, readers, and evaluators can ensure that the research is conducted in accordance with ethical standards and principles. The responsible conduct of research in any field is essential to maintain the integrity of the academic community and the trust of the public in the research principles.

Best regards,
